Motivation

Collect ideas about what people are looking for

Raise awareness about features that developers could write.

Themes from 2017 (part 1)

33+ topics from last year's discussions

Encryption detection and decryption

Mobile acquisition and analysis

Web browsers and website artifacts

Image analysis (object detection, skin tone)

Improve reports

Themes from 2017 (part 2)

OCR for JPEG and PDF

Fuzzy searching

Hide common files

APFS

Common exchange format

HTML Review Interface

....

What's Changed

Autopsy now has:

- Can use Google Tesseract for OCR

- Creation of git repository for Autopsy modules

- Encryption detection module

- Object detection module (plus submissions)

- Started work on bootable Linux CD for triage

What's Planned

Autopsy's roadmap includes:

- ○ Common exchange format CASE/UCO

- ○ More web browser support

We've heard that APFS is coming....

What Else?
